FGM '3

International Symposium on Structural and Functional Gradient Materials

October 10 - 12, 1994
Swiss Federal Institute of Technology
Lausanne, Switzerland

Scope

The conference is devoted to all aspects of gradient materials such as designing, processing, characterization, quality control and application. Emphasis is placed not only on the basic research but also on engineering. The conference is intended for all those interested in components with gradients of composition and/or microstructure in metallic, ceramic and polymer materials as well as in composite structures.

Conference Chairman : Prof. Dr. B. Ilschner

For further information, please contact the conference secretariat.
